

RESEARCH ARTICLE**How normal body temperature influence on the likeliness of pineapple**

Muhammad Imran Qadir, Asma Rasheed*

*Department of Medical Science, Institute of Molecular Biology and Biotechnology, Bahauddin Zakariya University, Multan, Pakistan***Received on: 20 August 2019; Revised on: 30 August 2019; Accepted on: 25 October 2019****ABSTRACT**

The purpose of the immediate study was to associate relations of normal body temperature with likeness of pineapple. One hundred and forty students take part in this study. A questionnaire was provided them and asked about their likes pineapple and normal body temperature. The present research shows that students like to eat pineapple have normal body temperature others then do not like to eat pineapple.

Keywords: Normal body, Temperature, Pineapple**INTRODUCTION**

According to medical science, the human normal body temperature is 98.6°F or 37°C and abnormal person body temperature is <37–38. Many factors stimulus our body temperature including activity, age, sex day of time, kids normal body temperature is 99°F37°C. Body temperature of woman's influenced by hormones or woman menstrual cycle. Human body temperature below 100.4°F or 38°C is considered to be a fever. Indications of the fever hot skin increased heart rate dehydration of the body weight loss. Dangerous body temperature 39–42 is high fever <42.4°C very high fever cause serious long-lasting destruction typical source of fever blood clamp skin infectious disease. Body temperature controls central nervous system. Body temperature controls upperparts of brain central nervous system. Pineapple is essential grow strong bones connective tissue, pineapple covers bromelain enzyme. Drinking pineapple juice brings high quantity of Vitamin C. Pineapple is tropical fruit ironic source of vitamins and minerals. Low calories in pineapple juice having decreased body temperature. Fresh pineapple can

be start summer season unfilled stomach best time to eating pineapple.^[1-5]

The objective of the immediate research was to associate with contact of normal body temperature with pineapple likeness.^[6,7]

MATERIALS AND METHODS

One hundred and forty students joined in this study. The inquiry was providing them, in which they asked about their likeness of pineapple and normal body temperature. All the students were measured normal body temperature with the help of thermometer.^[8-10]

Project

Census was intended about normal body temperature and pineapple likeliness.

Statistical investigation

The complete statistical investigation was done using Microsoft Excel.

RESULTS AND ANALYSIS

Relationship of normal body temperature with pineapple likeness is given in Table 1 student's

Table 1: Effect of normal body temperature (mean±standard deviation) with pineapple likeness

Normal body temperature	Likeness of pineapple	Dislikeness of pineapple	<i>P</i> -value
-	96.82±1.79	97.6±1.42	0.01

normal body temperature 96.82 ± 1.79 like pineapple. Moreover, normal body temperatures 97.6 ± 1.42 do not like pineapple.

CONCLUSION

The current inquiry shows that the student's normal body temperature to eat pineapple. Have more body temperature then the other does not like to eat pineapple.
