ABSTRACT

If someone is liking pigeon as a pet may be due to of their intelligent, effortless, and loving nature. The goal of this project is to link the love of pigeons as pets with the existence of blood in the urine. The students that took part in this study were 90. Urine dipstick test was used to perform the analysis of urine. Two types of hematuria present due to existence of red blood cells in urine. Pigeon is that beautiful bird used as pet in the houses mostly in villages. About 10.66% males have blood in urine and 17.99% females have blood in urine. From the sum of all subjects, mostly students have no blood in urine. Hence, it was observed from this study that the presence or absence has no relation of blood in urine with affection of pigeon as pet.

Keywords: Pigeon, Blood in urine, Students

INTRODUCTION

Urine blood is the disease that affects the kidney causing some infections. The medical term of blood in urine is Hematuria. Different situations and different diseases can cause this term. The situation of blood in our urine is the serious effect for the health that it can also cause serious, while it affects once time. These infections can cause major affect on health by causing cancer that lead to death. Various problems can affect on the causes of leakage of blood into the urine by near side urinary tract. This can be damages by the microorganism as bacteria enter through the urethra and multiply their number in the bladder and cause urinary tract infections. The treatment of certain diseases so the treatment of this disease is diagnosed by taking some medicines. To prevent these diseases drink plenty of water and urinate daily and practice hygiene good for health and treatment of this disease.

Pigeon is the skirt that is liked the most as positron release tomography. Some domestic pigeons are so

pin-up that they are used as pet. In other countries, these fowl used in the expo due to their beauty. These birds are also used for sending and receiving the messages in the era of Mughal Badshah. Some people have love of pigeon as pet and some people do not like the pigeon. If someone is liking pigeons as a pet may be due to their intelligent, effortless, and loving nature.

The purpose of this study was to link with love of pigeon as pet with presence or absence of blood in urine.^[1-4]

MATERIALS AND METHODS

The subjects that took part in this study were 90. Urine investigation of these participants was performed by urine dipstick test. The blood in urine was checked by experiment.

Project design

Questionary was design and questions were asked about the existence of blood in urine. Likeliness and dis-likeliness of subjects about the love of pigeons as pets.
